Barbara -

Thank you for the summary - It seems to bring forward some very good points.

(b) (5)

I was talking w/ Sue M. earlier and it might be useful for us to gather and share prior to the Wed dry run.

thanks,
danielle

Hi Danielle,

Here is my attempt to answer your questions but I will be around Mon or Tues to discuss with you and Tom. The public listening session on formaldehyde is on Tues from 9 to 4 pm.

Subject: Asthma studies and RfC derivation

Barbara, Tom,

Hi - As we look at putting together talking points for the upcoming NAS mtg, I am aware that we derived the RfC before we had identified all of the possible human studies (This was a function of the overall flow of the project overall several years.)

Walking through what we did for the RfC for the studies we had on the table is fairly straight forward. Perhaps the more difficult questions will come if there were other human studies which could have supported an RfC for asthma or allergic sensitization - but we didn't fully evaluate them.

So a few questions:

(b) (5)

What are your thoughts on the above? Should we set up some time Monday or Tuesday to discuss?

thanks,
danielle
